“Valuing our Heritage while Protecting our Future”

Please be advised that beginning January 1, 2015 developers and/or contractors are required to submit a **SWPPP (Storm Water Pollution Prevention Plan)**, and/or complete a **Homebuilders** application, which shall include the initial site grading before any construction permits are issued.

The Public Services Department (PSD) is responsible for the review and approval of the **SWPPP**, which will include a site review and inspections by the PSD **prior to** grading. This is required to ensure proper stormwater **Erosion & Sediment Controls (BMP's)** are in place in accordance with the State of Tennessee's NPDES Construction General Permit.

The Planning & Codes Department will advise anyone requesting a permit to contact the PSD office at 615-672-3654 to further discuss the required stormwater compliance documentation.

After documentation review by staff, the applicant will be required to attend a pre-construction meeting to address the stormwater Erosion & Sediment Control requirements for that particular construction site.
